Bad style elements in HTML

- <font face="arial">
- <body bgcolor="rgb">
- <b>
- <i>

Ok style elements

- <strong>
- <em>

Images

Common image types

- gif

- png

- jpeg

- svg

Png and Gif

- Great for graphics
- Great for maps
- Bad for photos.
- Can have transparency

Gif vs png

- Png wins
- Variable transparency with alpha channel
- Better compression.

Jpeg

- Your best bet for all photos
- Bad for graphics
- No transparency

.svg

- Is an xml format for drawing vectors.

- Vector formats can be scaled to any size without.

- They can be animated.
